VEHICLE INSTRUCTION CARD SUPPLEMENT

No responsibility is accepted for inaccuracies or misunderstanding caused by the wording of this guide. If in any doubt ask a member of staff for assistance.

ELECTRONIC PARKING BRAKE (EPB)

INFORMATION

Where fitted, the electronic parking brake replaces the mechanical handbrake and is designed to prevent the vehicle from accidentally rolling away. This system offers convenience and safety features in addition to those normally associated with a mechanical handbrake. Please refer to the primary Vehicle Instruction Guide for information about other operational instructions.

LOCATION

The diagrams above indicate example locations of the electronic parking brake (A) which is labelled with the universal icon symbol: **(P)**

ACTIVATION

The EPB will normally auto activate. *If will also activate if seat belts are not being worn, or when luggage placed on top of seats activates the system. To enable the system to function correctly, fasten seatbelts, and remove luggage from the seats and store it securely in the boot.* Pull the switch labelled A to manually apply the parking brake. The warning lamps on both the switch and instrument panel will light up to confirm its activation.

DEACTIVATION

The EPB will normally auto release. Depress the brake or accelerator pedal to auto release it, or press the switch (A) to manually release it. The associated warning lamps on both the switch and dashboard instrument panel will go out to confirm its deactivation. *Note: seatbelts should be fastened, and luggage should not be placed on seats.*

WHEN DRIVING AWAY

The parking brake will deactivate automatically when driving away, and it also prevents the vehicle from rolling back unintentionally for a few seconds when starting on a gradient. This works by driving off in a normal way, the parking brake will automatically release and the vehicle will start moving in the desired direction.

On vehicles fitted with an automatic gear box, you can apply the parking brake when stopping briefly at traffic lights etc., to avoid the vehicle creeping forward. When you drive off the parking brake will be automatically released.

DEADLOCKS

Deadlock / safelock messages shown on the instrument display when the engine is turned off simply indicate that once you exit the vehicle and lock the doors, they're effectively deadlocked and anyone left in the car wouldn't be able to get out in the event of an emergency. The warning is nothing to worry about and is just a standard advisory message.

SEATBELT WARNING LIGHTS

A seatbelt warning light may illuminate when the engine is turned on. This may mean that the electronic parking brake (EPB) becomes auto activated to prevent vehicle movement. To deactivate these warning lights, and turn off the auto activation of the EPB in this instance, ensure all passengers fasten their seatbelts, and remove any luggage from on top of the seats. For safety secure all luggage inside the boot.

WARNING LIGHTS AND WHAT THEY MEAN

Don't panic! Despite seeing a new light pop-up on your instrument panel, unless it is red it is likely the car is still running fine, and while there may be a problem to attend to, proceed with confidence and patience.

RED

Red indicates a potentially serious problem or safety issue. Attend to it! Red may also indicate an important reminder.

YELLOW

Yellow/orange means something needs to be serviced or repaired soon. If it is flashing, it is important that you contact your rental agent for advice.

GREEN

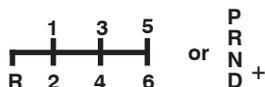

Green or blue is only telling you that a system is on or operating normally.

VEHICLE INSTRUCTION CARD

For assistance after an accident/incident, please call 0800 0280 999
 For assistance after a breakdown or help with tyres or windscreens please refer to the numbers on the tax disc holder.

CONTROLS

- 1 Heating & Ventilation
- 2 Hazard Lights
- 3 Starter Switch
- 4 Headlights
- 5 Sidelights
- 6 Indicators
- 7 Wipers
- 8 Rear Screen Wipers
- 9 Horn
- 10 Bonnet Release
- 11 Heated Rear Screen
- 12 Rear Fog Lamp
- 13 Front Fog Lamp
- 14 Electronic parking brake

CAUTION!

When parked, the parking brake should be fully applied with the vehicle left in first or reverse gear for vehicles equipped with manual transmission or P (Park) for vehicles with automatic transmission.

TYRE PRESSURES (COLD)

Check tyre pressure regularly
 Legal minimum tread depth is 1.6 mm

- 205/55 R16
- 225/45 R17
- 205/55 R18
- 225/40 R18
- 235/40 R18

Check the tyre pressure table found on the inside of driver's door B-pillar (or fuel filler cap).

Some models may be fitted with an electronic tyre pressure monitor.

Note: driving speeds and travel distances are restricted when using the tyre repair kit.

NOTE: SHOULD THIS VEHICLE NOT BE SUPPLIED WITH A SPARE WHEEL, PLEASE REFER TO THE TELEPHONE NUMBERS SHOWN ON THE TAX DISC HOLDER.

FUEL

Ensure you use the correct fuel type. Only use unleaded petrol in petrol vehicles (see inside of filler flap).

Fuel Tank Capacity:
 50.0 litres

IN CASE OF BREAKDOWN

Use hazard lights. Attempt to park in a safe position.

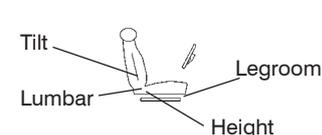

Use an emergency phone rather than a mobile as emergency services will then know the location of the vehicle.

CHILD SEATS

Never use a child seat in a front passenger seat which is fitted with an active airbag (SRS). Follow all fitting instructions carefully.

Check seat positioning and security before use.

DRIVER'S SEAT

Vehicle specifications are subject to change. When the engine is turned off, ensure that the starter switch is in position II when operating electrical items such as door mirrors and windows, etc. **This vehicle does not include any manufacturer handbooks or manuals.**

USEFUL INFORMATION ABOUT YOUR VEHICLE

- Locking the doors?** Key / remote control operated central locking. Depress the central locking button on the driver's door to lock the doors from the inside, or depress the door locking knobs.
- Anti-theft system?** Most vehicles are fitted with an alarm system. Passive arming of electronic engine immobiliser after removal of the key from the starter switch.
- Opening boot/tailgate?** Centrally locked. Use the key or remote control to unlock / open.
- Adjusting door mirrors?** Electric internal adjustment operated via a control knob on the driver's door.
- Opening the windows?** Electric front and rear operated via control switches on the driver's door.
- Operating the sunroof?** If fitted: electric panoramic sunroof operated by roof mounted switchgear.
- Using child door locks?** Fitted to the rear passenger doors. To operate press the central locking switch on the driver's door. Ensure the doors are securely locked.
- Starting the engine?** Ensure gear selector is in neutral (or N or P if automatic) and electronic parking brake is on. Place ignition key in starter switch. Use a normal starting routine. Select desired gear. Release electronic parking brake and brake pedal and gently press the accelerator to move the vehicle. Some models feature auto engine start/stop technology whereby the engine switches off when the vehicle is motionless, neutral gear is selected, and foot pedals are not depressed - press the clutch to instantly restart the engine.
- Opening fuel filler cap?** Centrally locked. Located under flap on rear nearside. Lift the edge of the flap to open it, and twist the cap off anticlockwise.
- Releasing the bonnet?** Pull the bonnet release lever located on the right side panel in the driver's foot well. Pull the release lever which protrudes through the bonnet grille to release the bonnet.
- Folding the rear seats?** The rear seat is divided into sections which can be flat-folded separately. To release the seat press the seat unlocking catch and fold the seat down. To return the seat to normal use, raise the seat and push it firmly to engage the seat lock. Check it is locked before using the seat. (The rear seat and front passenger seat can also be removed, to remove them: fold them flat and unlock the floor locks and slide/lift the seats out. To replace them: slide/lock them securely in place).
- How to change a tyre?** The tyre repair kit, tools and jack are stored in the side storage bins. Move the vehicle to firm / level ground. Turn the engine off, select first gear (manual) or P (automatic). Apply the electronic parking brake. Follow the tyre repair kit instructions. [Only if necessary: loosen the wheel nuts by turning them anticlockwise (do not remove them) before jacking up. Only use the specific reinforced jack points on the underside of the vehicle. Crank the jack to lift the vehicle. Completely loosen / remove nuts and wheel and replace the wheel. Refit / tighten the wheel nuts. Lower the vehicle. Tighten the wheel nuts.]
- How to drive an automatic?** To change gears press the button on the shift lever and move the lever forwards or backwards. Select N for neutral, P when leaving the vehicle, R for reversing (the vehicle must be at a complete standstill before this gear can be selected). For normal driving select D where the transmission will use all available forward gears automatically (a 'kickdown' facility is provided when the accelerator is pressed all the way to the floor past the normal acceleration point forcing the transmission to select a lower gear to obtain maximum acceleration. Release pressure on the accelerator to return to normal accelerator use). Use + or - to manually change gears up or down. Whenever the vehicle is at a standstill apply the electronic parking brake.

No responsibility is accepted for inaccuracies or misunderstanding caused by the wording of this guide. If in any doubt ask a member of staff for assistance.

- 6 Indicators
- 7 Wipers
- 8 Rear Screen Wipers
- 9 Horn
- 10 Bonnet Release
- 11 Heated Rear Screen
- 12 Rear Fog Lamp
- 13 Front Fog Lamp

Vehicle is fitted with a dash mounted parking / hand brake, located on lower right of dashboard.

CAUTION!

When parked, the parking brake should be fully applied with the vehicle left in first or reverse gear for vehicles equipped with manual transmission or P (Park) for vehicles with automatic transmission.

TYRE PRESSURES (COLD)

Check tyre pressure regularly
 Legal minimum tread depth is 1.6 mm

- 205/60 R16
- 225/40 R18 and 255/35 R18
- 235/40 R18 and 255/35 R18
- 235/35 R19 and 255/30 R19

Check the tyre pressure table found on the inside of driver's door B-pillar (or fuel filler cap).

Some models may be fitted with an electronic tyre pressure monitor.

Note: driving speeds and travel distances are restricted when using spacesaver spare tyres.

NOTE: SHOULD THIS VEHICLE NOT BE SUPPLIED WITH A SPARE WHEEL, PLEASE REFER TO THE TELEPHONE NUMBERS SHOWN ON THE TAX DISC HOLDER.

FUEL

Ensure you use the correct fuel type. Only use unleaded petrol in petrol vehicles (see inside of filler flap).

Fuel Tank Capacity:
 66.0 litres

IN CASE OF BREAKDOWN

Use hazard lights. Attempt to park in a safe position.

Use an emergency phone rather than a mobile as emergency services will then know the location of the vehicle.

CHILD SEATS

Never use a child seat in a front passenger seat which is fitted with an active airbag (SRS). Follow all fitting instructions carefully.

Check seat positioning and security before use.

DRIVER'S SEAT

Vehicle specifications are subject to change. When the engine is turned off, ensure that the starter switch is in position II when operating electrical items such as door mirrors and windows, etc. **This vehicle does not include any manufacturer handbooks or manuals.**

USEFUL INFORMATION ABOUT YOUR VEHICLE

- Locking the doors?** Key / remote control operated central dead locking. Depress the central locking button on the driver's door to lock the doors from the inside.
- Anti-theft system?** Most vehicles are fitted with an alarm system. Passive arming of electronic engine immobiliser after removal of the key from the starter switch.
- Opening boot/tailgate?** Centrally locked. Use the key or remote control to unlock / open. Or use the internal remote boot release located on the driver's door.
- Adjusting door mirrors?** Electric internal adjustment operated via a control pad on the driver's door.
- Opening the windows?** Electric front operated via control switches on the driver's door with manually operated rear. Or all electrically operated.
- Operating the sunroof?** If fitted: electric glass sunroof, operated by roof mounted switchgear.
- Using child door locks?** Fitted to the rear passenger doors. To operate press the central locking switch on the driver's door. Ensure the doors are securely locked.
- Starting the engine?** Ensure gear selector is in neutral (or N or P if automatic) and parking brake is on. Place ignition key in starter switch. Use a normal starting routine. (Some models feature an engine start/stop button, just push to stop or start the engine). Select desired gear. Release parking brake and brake pedal and gently press the accelerator to move the vehicle. Some models feature auto engine start/stop technology whereby the engine switches off when neutral gear is selected and the vehicle is motionless - just select first gear to instantly restart.
- Opening fuel filler cap?** Centrally locked. Located under flap on rear offside. Lift the edge of the flap to open it, and twist the cap off anticlockwise.
- Releasing the bonnet?** Pull the bonnet release lever located on the right side panel in the driver's foot well. Pull the catch protruding through the bonnet grille to release the bonnet.
- Folding the rear seats?** The rear seat is divided into sections which can be folded separately. To release the seat press the seat unlocking catch and fold the seat down. To return the seat to normal use, raise the seat and push it firmly to engage the seat lock. Check it is locked before using the seat.
- How to change a tyre?** Lift the recess cover inside the boot to access the space saver spare tyre. The tools and jack are stored with the wheel. Move the vehicle to firm / level ground. Turn the engine off, select first gear (manual) or P (automatic). Apply the parking brake. Loosen the wheel nuts by turning them anticlockwise (do not remove them) before jacking up. Only use the specific reinforced jack points on the underside of the vehicle. Crank the jack to lift the vehicle. Completely loosen / remove nuts and wheel and replace with the spare. Refit / tighten the wheel nuts. Lower the vehicle. Tighten the wheel nuts. Note: you must fit the spare using the supplied dedicated wheel nuts (if applicable) - do not use those from an alloy wheel. Call us for assistance if required.
- How to drive an automatic?** To change gears press the button on the shift lever and move the lever forwards or backwards. Select N for neutral, P when leaving the vehicle, R for reversing (the vehicle must be at a complete standstill before this gear can be selected). For normal driving select D where the transmission will use all available forward gears automatically (a 'kickdown' facility is provided when the accelerator is pressed all the way to the floor past the normal acceleration point forcing the transmission to select a lower gear to obtain maximum acceleration. Release pressure on the accelerator to return to normal accelerator use). Use + or - to manually change gears up or down. Whenever the vehicle is at a standstill apply the parking brake.

For assistance after an accident/incident, please call 0800 0280 999
 For assistance after a breakdown or help with tyres or windscreens please refer to the numbers on the tax disc holder.

CONTROLS

- 1 Heating & Ventilation
- 2 Hazard Lights
- 3 Starter Switch
- 4 Headlights
- 5 Sidelights
- 6 Indicators
- 7 Wipers
- 8 Rear Screen Wipers
- 9 Horn
- 10 Bonnet Release
- 11 Heated Rear Screen
- 12 Rear Fog Lamp
- 13 Front Fog Lamp

Vehicle is fitted with a dash mounted parking / hand brake, located on lower right of dashboard.

vehicle is fitted with a gear shift lever mounted on the steering column

CAUTION!

When parked, the parking brake should be fully applied with the vehicle left in first or reverse gear for vehicles equipped with manual transmission or P (Park) for vehicles with automatic transmission.

TYRE PRESSURES (COLD)

Check tyre pressure regularly
 Legal minimum tread depth is 1.6 mm

255/55 R18
 255/50 R19

Check the tyre pressure table found on the inside of driver's door B-pillar (or fuel filler cap).

Some models may be fitted with an electronic tyre pressure monitor.

Note: driving speeds and travel distances are restricted when using spacesaver spare tyres.

NOTE: SHOULD THIS VEHICLE NOT BE SUPPLIED WITH A SPARE WHEEL, PLEASE REFER TO THE TELEPHONE NUMBERS SHOWN ON THE TAX DISC HOLDER.

FUEL

Ensure you use the correct fuel type. Only use unleaded petrol in petrol vehicles (see inside of filler flap).

Fuel Tank Capacity:
 95.0 litres

IN CASE OF BREAKDOWN

Use hazard lights. Attempt to park in a safe position.

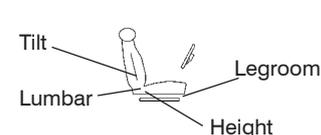

Use an emergency phone rather than a mobile as emergency services will then know the location of the vehicle.

CHILD SEATS

Never use a child seat in a front passenger seat which is fitted with an active airbag (SRS). Follow all fitting instructions carefully.

Check seat positioning and security before use.

DRIVER'S SEAT

Vehicle specifications are subject to change. When the engine is turned off, ensure that the starter switch is in position II when operating electrical items such as door mirrors and windows, etc. **This vehicle does not include any manufacturer handbooks or manuals.**

USEFUL INFORMATION ABOUT YOUR VEHICLE

- Locking the doors?** Key / remote control operated central dead locking. Depress the door locking knobs or central locking button on the driver's door to lock from the inside.
- Anti-theft system?** Vehicles are fitted with an alarm system. Passive arming of electronic engine immobiliser after removal of the key from the starter switch.
- Opening boot/tailgate?** Centrally locked. Use the key or remote control to unlock / open. Vehicles are fitted with a powered system to automatically open/close the tailgate.
- Adjusting door mirrors?** Electric internal adjustment operated via a control pad on the driver's door.
- Opening the windows?** Electric front and rear operated via control switches on the driver's door.
- Operating the sunroof?** If fitted: electric glass sunroof, operated by roof mounted switchgear.
- Using child door locks?** To operate press the central locking switches on the driver's door to lock or unlock them. Ensure the doors are securely locked.
- Starting the engine?** Ensure gear selector is in N or P if automatic and parking brake is on. Place ignition key in starter switch. Use a normal starting routine. Select desired gear. Release parking brake and brake pedal and gently press the accelerator to move the vehicle. Some models feature auto engine start/stop technology whereby the engine switches off when neutral gear is selected and the vehicle is motionless - just select first gear to instantly restart.
- Opening fuel filler cap?** Centrally locked. Located under flap on rear offside. Lift the edge of the flap to open it, and twist the cap off anticlockwise.
- Releasing the bonnet?** Pull the bonnet release lever located on the right side panel in the driver's foot well. Pull the catch which protrudes through the bonnet grille to release the bonnet.
- Folding rear seats?** The rear seat is divided into sections which can be flat-folded separately. To release the seat press the seat unlocking catch and fold the seat down. To return the seat to normal use, raise the seat and push it firmly to engage the seat lock. Check it is locked before using the seat. (The third seat row can be folded / raised electrically via button operation).
- How to change a tyre?** Lift the recess cover inside the boot to access the standard spare tyre. The tools and jack are stored with the wheel. Move the vehicle to firm / level ground. Turn the engine off, select first gear (manual) or P (automatic). Apply the handbrake. Loosen the wheel nuts by turning them anticlockwise (do not remove them) before jacking up. Only use the specific reinforced jack points on the underside of the vehicle. Crank the jack to lift the vehicle. Completely loosen / remove nuts and wheel and replace with the spare. Refit / tighten the wheel nuts. Lower the vehicle. Tighten the wheel nuts. Note: you must fit the steel spare using the dedicated wheel nuts - do not use those from an alloy wheel.
- How to drive an automatic?** To change gears move the steering wheel mounted shift lever. Select N for neutral, P when leaving the vehicle, R for reversing (the vehicle must be at a complete standstill before this gear can be selected). For normal driving select D where the transmission will use all available forward gears automatically (a 'kickdown' facility is provided when the accelerator is pressed all the way to the floor past the normal acceleration point forcing the transmission to select a lower gear to obtain maximum acceleration. Release pressure on the accelerator to return to normal accelerator use). Use + or - to manually change gears up or down in manual (M) mode. When the vehicle is at a standstill apply the parking brake.

No responsibility is accepted for inaccuracies or misunderstanding caused by the wording of this guide. If in any doubt ask a member of staff for assistance.

DRIVER'S SEAT

Vehicle specifications are subject to change. When the engine is turned off, ensure that the starter switch is in position II when operating electrical items such as door mirrors and windows, etc. **This vehicle does not include any manufacturer handbooks or manuals.**

USEFUL INFORMATION ABOUT YOUR VEHICLE

- Locking the doors?** Key / remote control operated central dead locking. Depress the central locking button on the centre console to lock the doors from the inside.
- Anti-theft system?** Most vehicles are fitted with an alarm system. Passive arming of electronic engine immobiliser after removal of the key from the starter switch.
- Opening boot/tailgate?** Centrally locked. Use the key or remote control to unlock / open. Or use the internal remote boot release located on the driver's door.
- Adjusting door mirrors?** Electric internal adjustment operated via a control pad on the driver's door.
- Opening the windows?** Electric front operated via control switches on the driver's door.
- Opening the roof?** To raise or lower the convertible roof, press the switch located on the centre console. Only operate this button when at a complete standstill.
- Starting the engine?** Ensure gear selector is in neutral (N or P) and parking brake is on. Place ignition key in starter switch and use a normal starting routine. (Some models feature an engine start/stop button, just push to stop or start the engine). Select desired gear. Release parking brake and brake pedal and gently press the accelerator to move the vehicle. Vehicles feature auto engine start/stop technology whereby the engine switches off when neutral gear is selected and the vehicle is motionless and foot pedals are not depressed - just select first gear to instantly restart.
- Opening fuel filler cap?** Centrally locked. Located under flap on rear offside. Lift the edge of the flap to open it, and twist the cap off anticlockwise.
- Releasing the bonnet?** Pull the bonnet release lever located on the right side panel in the driver's foot well. Pull the catch which protrudes through the bonnet grille to release the bonnet.
- How to change a tyre?** Lift the floor recess cover inside the boot to access the tyre repair kit, tools and jack. Move the vehicle to firm / level ground. Turn the engine off, select P (automatic). Apply the parking brake. Follow the directions on the tyre repair kit - or call the helpline number for assistance. Only use the specific reinforced jack points on the underside of the vehicle. Crank the jack to lift the vehicle.
- How to drive an automatic?** To change gears press the button on the shift lever and move the lever forwards or backwards. Select N for neutral, P when leaving the vehicle, R for reversing (the vehicle must be at a complete standstill before this gear can be selected). For normal driving select D where the transmission will use all available forward gears automatically (a 'kickdown' facility is provided when the accelerator is pressed all the way to the floor past the normal acceleration point forcing the transmission to select a lower gear to obtain maximum acceleration. Release pressure on the accelerator to return to normal accelerator use). Use + or - to manually select gears. Whenever the vehicle is at a standstill apply the parking brake.

TYRE PRESSURES (COLD)

Check tyre pressure regularly
 Legal minimum tread depth is 1.6 mm

- 205/65 R16
- 225/60 R16
- 225/55 R17
- 245/45 R18

Check the tyre pressure table found on the inside of driver's door B-pillar.

Some vehicles may be fitted with an electronic tyre pressure monitor.

NOTE: SHOULD THIS VEHICLE NOT BE SUPPLIED WITH A SPARE WHEEL, PLEASE REFER TO THE TELEPHONE NUMBERS SHOWN ON THE TAX DISC HOLDER.

FUEL

Ensure you use the correct fuel type. Only use unleaded petrol in petrol vehicles (see inside of filler flap).

Fuel Tank Capacity:
 75.0 litres

IN CASE OF BREAKDOWN

Use hazard lights. Attempt to park in a safe position.

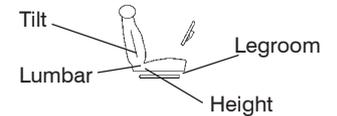

Use an emergency phone rather than a mobile as emergency services will then know the location of the vehicle.

CHILD SEATS

Never use a child seat in a front passenger seat which is fitted with an active airbag (SRS). Follow all fitting instructions carefully.

Check seat positioning and security before use.

DRIVER'S SEAT

Vehicle specifications are subject to change. When the engine is turned off, ensure that the starter switch is in position II when operating electrical items such as door mirrors and windows, etc. **This vehicle does not include any manufacturer handbooks or manuals.**

USEFUL INFORMATION ABOUT YOUR VEHICLE

- Locking the doors?** Key / remote control operated central deadlocking. Door auto-lock on vehicle motion. Depress central locking switch to lock the door from the inside.
- Anti-theft system?** Most vehicles are fitted with an alarm system. Passive arming of electronic engine immobiliser after removal of the key from the starter switch.
- Opening rear doors?** Centrally locked. Use the key or remote control to unlock / open. The vehicle is fitted with sliding rear doors. Some models feature keyless entry / powered sliding door opening/closure.
- Opening the boot/tailgate?** Centrally locked. Use the key or remote control to unlock / open. Vehicles may be fitted with a powered system to automatically open/close the tailgate.
- Adjusting door mirrors?** Electric internal adjustment operated via a control pad on the extreme right-side of the dashboard.
- Opening the windows?** Electric front operated via control switches on the driver's door.
- Opening sunroof?** If fitted - Electric tilt/slide sunroof operated by roof mounted switchgear.
- Starting the engine?** Ensure gear selector is in neutral (or N or P if automatic) and parking brake is on. Place ignition key in starter switch. Use a normal starting routine. Select desired gear. Release parking brake and brake pedal and gently press the accelerator to move the vehicle. Some vehicles may feature auto start/stop technology, whereby engine automatically shuts off when engine is idling and gear is in neutral - just depress the clutch to instantly restart.
- Opening fuel filler cap?** Located behind a flap on the mid-nearside of the vehicle. Lift the edge of the flap to open it, and twist the cap off anticlockwise.
- Folding rear seats?** The rear seat rows are divided into sections which can be flat-folded separately. To release the seat press the seat unlocking catch and fold the seat down. To return the seat to normal use, raise the seat and push it firmly to engage the seat lock. Check it is locked before using the seat.
- Releasing the bonnet?** Pull the bonnet release lever located on the right side panel in the driver's foot well. Pull the catch which protrudes through the bonnet grille to release the bonnet.
- How to change a tyre?** The wheel is located beneath the floor panel located at the rear of the vehicle. Use the tools to undo the retaining screws located under small access covers adjacent to the door lock mechanism on the floor, seen when the rear doors are opened. The tools and jack are stored behind a panel under the floor of the passenger footwell, accessed from the passenger side of the vehicle. Move the vehicle to firm / level ground. Turn the engine off, select first gear (manual) or P (automatic). Apply the handbrake. Loosen the wheel nuts by turning them anticlockwise (do not remove them) before jacking up. Only use the specific reinforced jack points on the underside of the vehicle. Crank the jack to lift the vehicle. Completely loosen / remove nuts and wheel and replace with the spare. Refit / tighten the wheel nuts. Lower the vehicle. Tighten the wheel nuts. Note: you must fit the steel spare using the dedicated wheel nuts - do not use those from an alloy wheel.
- How to drive an automatic?** To change gears press the button on the shift lever and move the lever forwards or backwards. Select N for neutral, P when leaving the vehicle, R for reversing (the vehicle must be at a complete standstill before this gear can be selected). For normal driving select D where the transmission will use all available forward gears automatically (a 'kickdown' facility is provided when the accelerator is pressed all the way to the floor past the normal acceleration point forcing the transmission to select a lower gear to obtain maximum acceleration. Release pressure on the accelerator to return to normal accelerator use). Use D+ or D- to manually change gears up or down. Whenever the vehicle is at a standstill apply the parking brake.

VEHICLE INSTRUCTION CARD

For assistance after an accident/incident, please call 0800 0280 999
 For assistance after a breakdown or help with tyres or windscreens please refer to the numbers on the tax disc holder.

CONTROLS

- 1 Heating & Ventilation
- 2 Hazard Lights
- 3 Starter Switch
- 4 Headlights
- 5 Sidelights
- 6 Indicators
- 7 Wipers
- 8 Rear Screen Wipers
- 9 Horn
- 10 Bonnet Release
- 11 Heated Rear Screen
- 12 Rear Fog Lamp
- 13 Front Fog Lamp

CAUTION!

When parked, the parking brake should be fully applied with the vehicle left in first or reverse gear for vehicles equipped with manual transmission or P (Park) for vehicles with automatic transmission.

TYRE PRESSURES (COLD)

Check tyre pressure regularly
 Legal minimum tread depth is 1.6 mm

- 215/60 R17
- 235/50 R18
- 235/45 R19

Check the tyre pressure table found on the inside of driver's door B-pillar (or fuel filler cap).

Some models may be fitted with an electronic tyre pressure monitor.

Note: driving speeds and travel distances are restricted when using spacesaver spare tyres.

NOTE: SHOULD THIS VEHICLE NOT BE SUPPLIED WITH A SPARE WHEEL, PLEASE REFER TO THE TELEPHONE NUMBERS SHOWN ON THE TAX DISC HOLDER.

FUEL

Ensure you use the correct fuel type. Only use unleaded petrol in petrol vehicles (see inside of filler flap).

Fuel Tank Capacity:
 50.0 litres

IN CASE OF BREAKDOWN

Use hazard lights. Attempt to park in a safe position.

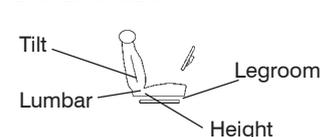

Use an emergency phone rather than a mobile as emergency services will then know the location of the vehicle.

CHILD SEATS

Never use a child seat in a front passenger seat which is fitted with an active airbag (SRS). Follow all fitting instructions carefully.

Check seat positioning and security before use.

DRIVER'S SEAT

Vehicle specifications are subject to change. When the engine is turned off, ensure that the starter switch is in position II when operating electrical items such as door mirrors and windows, etc. **This vehicle does not include any manufacturer handbooks or manuals.**

USEFUL INFORMATION ABOUT YOUR VEHICLE

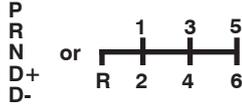

- Locking the doors?** Key / remote control operated central dead locking. Depress the door locking knobs or central locking button on the driver's door to lock from the inside.
- Anti-theft system?** Vehicles are fitted with an alarm system. Passive arming of electronic engine immobiliser after removal of the key from the starter switch.
- Opening boot/tailgate?** Centrally locked. Use the key or remote control to unlock / open. Vehicles are fitted with a powered system to automatically open/close the tailgate.
- Adjusting door mirrors?** Electric internal adjustment operated via a control pad on the driver's door.
- Opening the windows?** Electric front and rear operated via control switches on the driver's door.
- Operating the sunroof?** If fitted: electric panoramic glass sunroof, operated by roof mounted switchgear.
- Using child door locks?** To operate press the central locking switches on the driver's door to lock or unlock them. Ensure the doors are securely locked.
- Starting the engine?** Ensure gear selector is in N or P if automatic and parking brake is on. Place ignition key in starter switch. Use a normal starting routine (alternatively, some vehicles feature an engine start/stop button - press it to turn on/off the engine). Select desired gear. Release parking brake and brake pedal and gently press the accelerator to move the vehicle. Some models also feature auto engine start/stop technology whereby the engine switches off when neutral gear is selected and the vehicle is motionless and pedals are not depressed - just select first gear to instantly restart (or depress accelerator on automatics).
- Opening fuel filler cap?** Centrally locked. Located under flap on rear offside. Lift the edge of the flap to open it, and twist the cap off anticlockwise.
- Releasing the bonnet?** Pull the bonnet release lever located on the right side panel in the driver's foot well. Pull the catch which protrudes through the bonnet grille to release the bonnet.
- Folding rear seats?** The rear seat is divided into sections which can be flat-folded separately. To release the seat press the seat unlocking catch and fold the seat down. To return the seat to normal use, raise the seat and push it firmly to engage the seat lock. Check it is locked before using the seat.
- How to change a tyre?** Lift the recess cover inside the boot to access the tyre repair kit, tools and jack. **Note:** This vehicle is not usually supplied with a conventional spare wheel and tyre, but a tyre repair kit may be supplied. In the event of having a punctured tyre please call the National Car Rental Tyre Helpline 0800 - 16 95 875 for assistance. To repair the wheel using the repair kit: move the vehicle to firm / level ground. Turn the engine off, select first gear. Apply the parking brake. Only use the specific reinforced jack points on the underside of the vehicle. Fit the jack. Crank the jack to lift the vehicle. Follow the instructions to use the tyre repair kit or contact us for assistance.
- How to drive an automatic?** Use the gear selector to choose N for neutral, P when leaving the vehicle, R for reversing (the vehicle must be at a complete standstill before this gear can be selected). For normal driving select D where the transmission will use all available forward gears automatically (a 'kickdown' facility is provided when the accelerator is pressed all the way to the floor past the normal acceleration point forcing the transmission to select a lower gear to obtain maximum acceleration. Release pressure on the accelerator to return to normal accelerator use). Manually change gears up or down in manual (M) mode. When the vehicle is at a standstill apply the parking brake.

TYRE PRESSURES (COLD)

Check tyre pressure regularly
 Legal minimum tread depth is 1.6 mm

- 225/55 R17
- 245/45 R18
- 245/40 R19
- 275/35 R19
- 245/35 R20
- 275/30 R20

Check the tyre pressure table found on the inside of driver's door B-pillar (or fuel filler cap). Models refitted with an electronic tyre pressure monitor.

Note: driving speeds and travel distances are restricted when using tyres repaired with tyrefit sealant or runflat tyres that have been punctured.

NOTE: SHOULD THIS VEHICLE NOT BE SUPPLIED WITH A SPARE WHEEL, PLEASE REFER TO THE TELEPHONE NUMBERS SHOWN ON THE TAX DISC HOLDER.

FUEL

Ensure you use the correct fuel type. Only use unleaded petrol in petrol vehicles (see inside of filler flap).

Fuel Tank Capacity:
 66 litres

IN CASE OF BREAKDOWN

Use hazard lights. Attempt to park in a safe position.

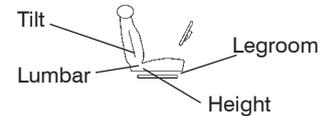

Use an emergency phone rather than a mobile as emergency services will then know the location of the vehicle.

CHILD SEATS

Never use a child seat in a front passenger seat which is fitted with an active airbag (SRS). Follow all fitting instructions carefully.

Check seat positioning and security before use.

DRIVER'S SEAT

Vehicle specifications are subject to change. When the engine is turned off, ensure that the starter switch is in position II when operating electrical items such as door mirrors and windows, etc. **This vehicle does not include any manufacturer handbooks or manuals.**

USEFUL INFORMATION ABOUT YOUR VEHICLE

- Locking the doors?** Key / remote control operated central dead locking. Depress the central locking buttons on the driver's door to lock and unlock the doors from the inside.
- Anti-theft system?** Vehicles are fitted with an alarm system. Passive arming of electronic engine immobiliser engine is turned off.
- Opening boot/tailgate?** Centrally locked. Use the key or remote control to unlock / open. Saloons: use the internal remote boot release to unlock it. Estate models: use the automatic powered tailgate button in the rear compartment and on driver's door.
- Adjusting door mirrors?** Electric internal adjustment operated via a control pad on the driver's door.
- Opening the windows?** Electric front and rear operated via control switches on the driver's door.
- Operating the sunroof?** If fitted: electric panoramic sunroof, operated by roof mounted switchgear.
- Using child door locks?** To operate press the manual locking switch for the rear doors to lock or unlock them. Ensure the doors are securely locked. Note: all doors auto lock on vehicle motion.
- Starting the engine?** Ensure gear selector is in neutral (or N or P if automatic) and electronic parking brake is on. Ensure the remote key is carried in your pocket or bag. Press the engine start/stop button on the centre console to start or stop the engine. Select desired gear. Release electronic parking brake and brake pedal and gently press the accelerator to move the vehicle. Some models feature auto engine start/stop technology whereby the engine switches off when the vehicle is motionless, neutral gear is selected, and foot pedals are not depressed - press the foot pedal to instantly restart the engine.
- Opening fuel filler cap?** Centrally locked. Located under flap on rear offside. Lift the edge of the flap to open it, and twist the cap off anticlockwise.
- Folding rear seats?** The rear seat is divided into sections which can be flat-folded separately. To release the seat press the seat unlocking catch and fold the seat down. To return the seat to normal use, raise the seat and push it firmly to engage the seat lock. Check it is locked before using the seat.
- Releasing the bonnet?** Pull the bonnet release lever located on the right side panel in the driver's foot well. Pull the catch which protrudes through the bonnet grille to release the bonnet.
- How to change a tyre?** Lift the recess cover inside the boot to access the tyre repair kit (some models may be fitted with runflat tyres - which should not require immediate repair). The tools and jack are stored with the wheel. Move the vehicle to firm / level ground. Turn the engine off, select first gear (manual) or P (automatic). Apply the electronic parking brake. Loosen the wheel nuts by turning them anticlockwise (do not remove them) before jacking up. Only use the specific reinforced jack points on the underside of the vehicle. Crank the jack to lift the vehicle. Completely loosen / remove nuts. Follow the tyre repair kit instructions (or phone our helpline for assistance). Refit / tighten the wheel nuts. Lower the vehicle. Tighten the wheel nuts.
- How to drive an automatic?** To change gears use the rotary selector dial to select the driving mode. Select N for neutral, P when leaving the vehicle, R for reversing (the vehicle must be at a complete standstill before this gear can be selected). For normal driving select D where the transmission will use all available forward gears automatically (a 'kickdown' facility is provided when the accelerator is pressed all the way to the floor past the normal acceleration point forcing the transmission to select a lower gear to obtain maximum acceleration. Release pressure on the accelerator to return to normal accelerator use). Use + or - to manually change gears up or down. Whenever the vehicle is at a standstill apply the electronic parking brake.

No responsibility is accepted for inaccuracies or misunderstanding caused by the wording of this guide. If in any doubt ask a member of staff for assistance.
